OVERVIEW

The **Licensee Education** on **Alcohol** and **Drugs** (**LEAD**) **Class Roster Maintenance** web application is for the correction of student information, Issue / Reissue certificate(s) and provide status on the certificate processing.

The application provides the ability to look up a single student or provide a student roster for a selected class. The single student page or class roster page provides the ability to modify selected student information and save the changes. It also provides the ability to have their certificate emailed to them from these pages. Changes can be made to their name (name correction), email address, phone number, and if they passed or failed or did not attend the class.

Warning: When the **Submit** button is clicked, any changes made are committed, no roll back available. Also **NO** confirmation (are you sure) popup box is displayed when the **Submit** button is clicked.

FEATURES

STUDENTS

The following are the features when working with a single student:

- **Student Search** lookup page
  - Search By
    - partial name
    - partial email address
    - confirmation number
    - phone number
  - Displays a list of student found by search selection
- **Student Information** page displays information of the class the student is in and student information for the selected student with selected information which can be changed and saved. This page also provides the ability to complete the student registration process.
  - Flag to indicate student has not finished the registration processed
  - Flag to indicate student is on the standby list
  - Name (editable)
  - Email Address (editable)
  - Phone Number (editable)
  - Pass / Fail / NoAttend buttons (changeable)
  - Status field to indicate status of certificate if the student had already had a certificate sent to them.
    - Pending Certificate has be scheduled to be created but has not
    - Processing Certificate being created
    - Failed Error in the generation of the certificate
    - Processed Certificate has been generated and emailed
  - Date certificate was processed
  - Check Box that can be checked to indicate that the certificate is to be created and emailed to the student when the Submit button is clicked on.
  - Option for auto refresh of the certificate status as it is being processed

CLASS ROSTER

The following are the features when working with a class roster:

- Class Search lookup page
  - Search by
    - District
    - Classes after or on a selected date
    - Classes on or before a selected date
  - Displays a list of classes that match the search criteria
- Class Roster page displays all the students for the selected class. The page provides the ability to complete the student registration process and deleted students from the class. Selected student information for each student can be changed and saved.
  - Flag to indicate student has not finished the registration processed
  - Flag to indicate student is on the standby list
  - Name (editable)
  - Email Address (editable)
  - Phone Number (editable)
  - Pass / Fail / NoAttend buttons (changeable)
  - Status field to indicate status of certificate if the student had already had a certificate sent to them.
    - Pending Certificate has be scheduled to be created but has not
    - Processing Certificate being created
    - Failed Error in the generation of the certificate
    - Processed Certificate has been generated and emailed
  - Date certificate was processed
  - Check Box that can be checked to indicate that the certificate is to be created and emailed to the student when the Submit button is clicked on. This can be done for any number of students at the same time. (1 to n)
  - Also an option for auto refresh of the certificate status for all students for the selected certificates that were selected to be processed

LOGIN

When you first enter into the LEAD Class Roster Maintenance web application you will be brought to the following Login screen.

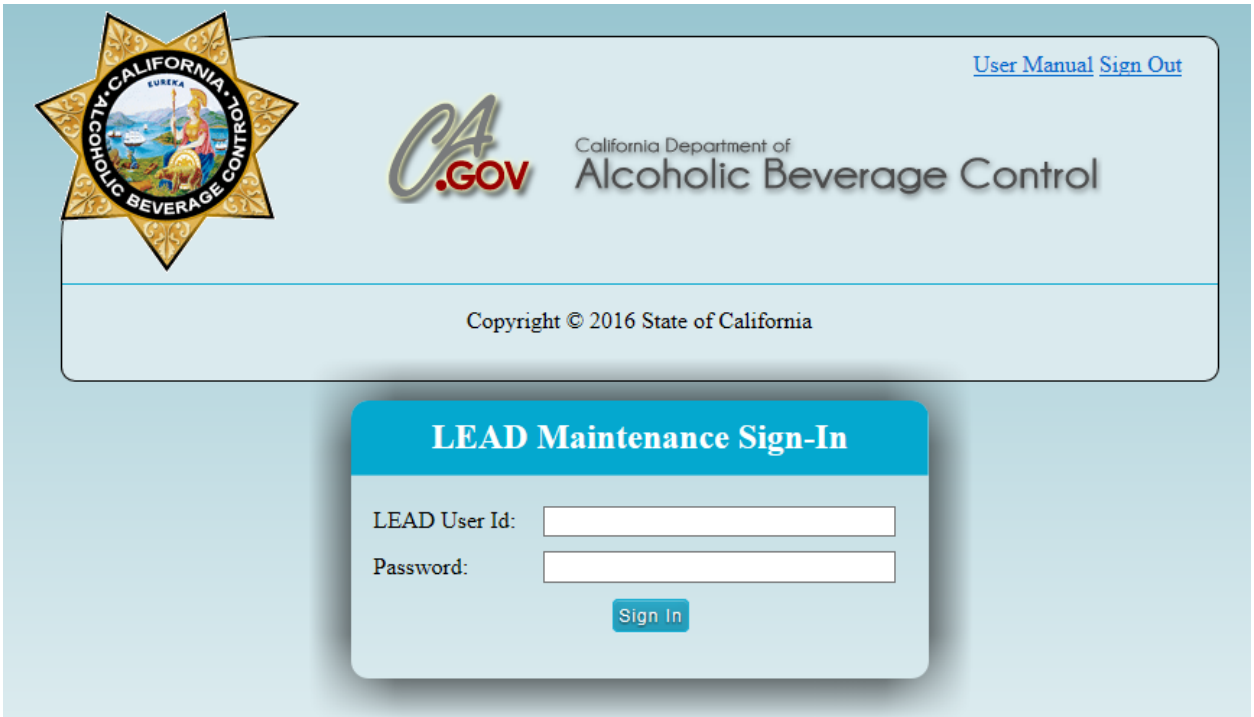

Figure 1 – LEAD Maintenance Sign-In Page

The **LEAD User Id** and password will be the same user id you use to login into the internal **TRACE LEAD** web site. After a successful sign in, the **Main Menu** page will be displayed.

MAIN MENU PAGE

On the **Main Menu** page, there are three selections. **Class Roster Maintenance**, **Re-issue Student Certificate** and **User Manual**.

Class Roster Maintenance is used when you want to access all the students for a selected class. This can be used to send / resend selected students their certificates and or make changes to more than one student.

Re-issue Student Certificate is used when changes need to be made to a single student and or certificate emailed to the student.

User Manual is a link to this user manual.

Figure 2 - Main Menu Page

CLASS SEARCH PAGE

On the **Search for Class** page, there are three filters that can be used to restrict the number of classes shown on the results page.

- By District (default All Districts)
- By Class Start Date This will filter out any classes with a training date before the date entered. (Default beginning of the previous month)
- By Class End Date This will filter out any classes with a training date after the date entered. (Default last date of current month)

Once the filters have been selected, click on **Search** button to retrieve a list of classes that meet the search criteria.

Figure 3 – Search for Classes

The **Class List** page will show the class search results.

Figure 4 – LEAD Class Search Results

The result list will display the **Class Status** (**Class Full** or **Canceled** or blank), **District**, the **Location** of the class, and **Training Date**.

To select a class, click on the **Select** button of the class you want to display.

LEAD CLASS ROSTER PAGE

On the **LEAD Class Roster** page, the date and time of the class, district, class location, class size, number of students register, and the **Student Roster** will be displayed. In the **Student Roster**, the following student information will be displayed.

- Flag to indicate if student had finished the registration process
- Flag to indicate if student is a standby student
- Students confirmation number
- Student name
- Email address
- Student phone number
- Pass, Fail, and NoAtted status
- Certificate Status
- Certificate processed date
- Send check box to send certificate or failed class email
- Delete check box to delete selected students

Also the page provides the ability to completed registration process for a student if not yet completed.

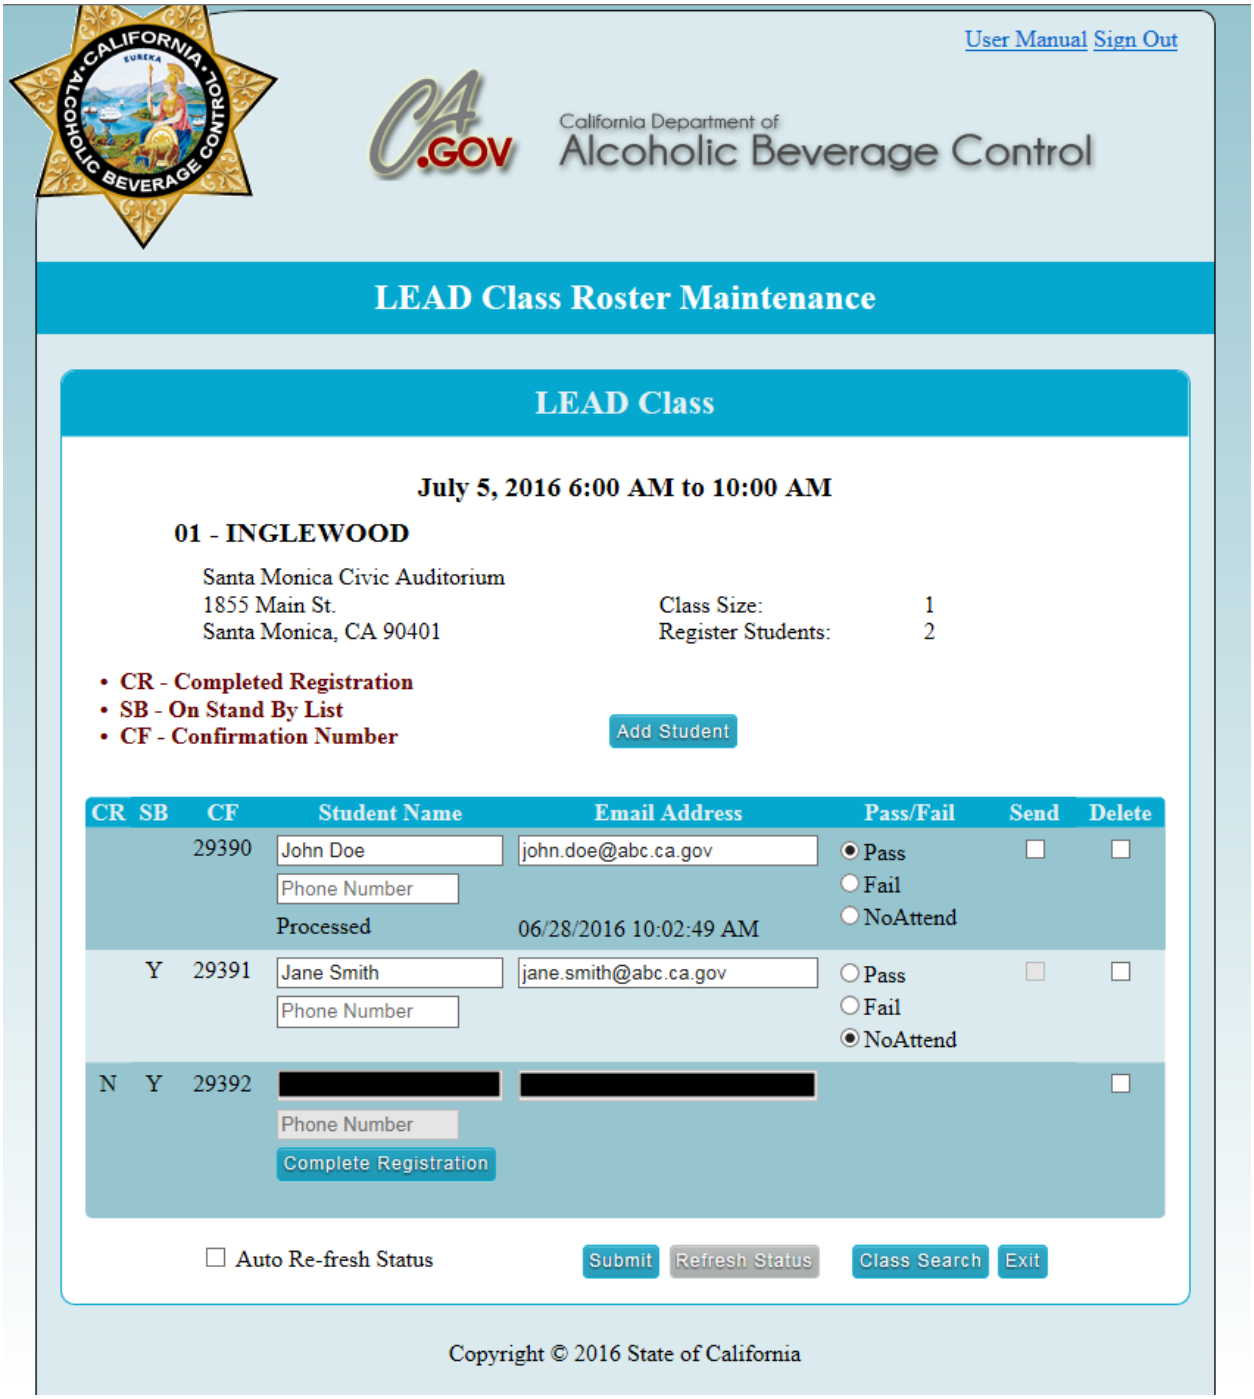

Figure 5 – LEAD Class Student Roster

Before any changes can be made to a student record, the student must have finished the registration process. This page does have the ability to complete the registration process for the student. Any student displayed on the screen that has not completed the registration process will have under the phone number text box the button "**Complete Registration**". Clicking on the "**Complete Registration**" will immediately update the student to **Completed Registration** status (***NO*** *confirmation email will be sent to the student*).

CORRECTIONS TO STUDENTS:

- Enter any changes in the text boxes and or can select whether the student Pass, Failed, or did not attend the class (**NoAttend**). When **Pass** or **Fail** radio buttons are selected, the **Send** check box is automatically checked.
- Once all the changes have been completed, click on the **Submit** button to update the student(s) record. Also if the Send check box is checked, a Pass (**Certificate**) or failed email will be sent to the student.

Even if a student status shows that a certificate has been generated and emailed, you still can send another certificate to the student.

SEND EMAILS:

- If **Pass** or **Fail** not selected, select whether or not the student passed or failed the class. When selected, the **Send** check box will automatically be checked.
- If **Pass** or **Fail** was already been selected, click on the **Send** check box
- Select **Auto Re-fresh Status** check box if you want the status of the processing of the certificates be automatically retrieved between every 20 to 30 seconds to monitor the process of the certificates being generated and emailed. If not checked, the manual **Refresh Status** button can be selected to get the current student status. (Do not make any changes after submit if using **Auto Re-fresh**)
- Click on **Submit** to send emails and update any other correction made to the student(s) record. The following screen showing the status of each student record while processing Passed students. For Failed student no status will be shown. (*This information is not available*)

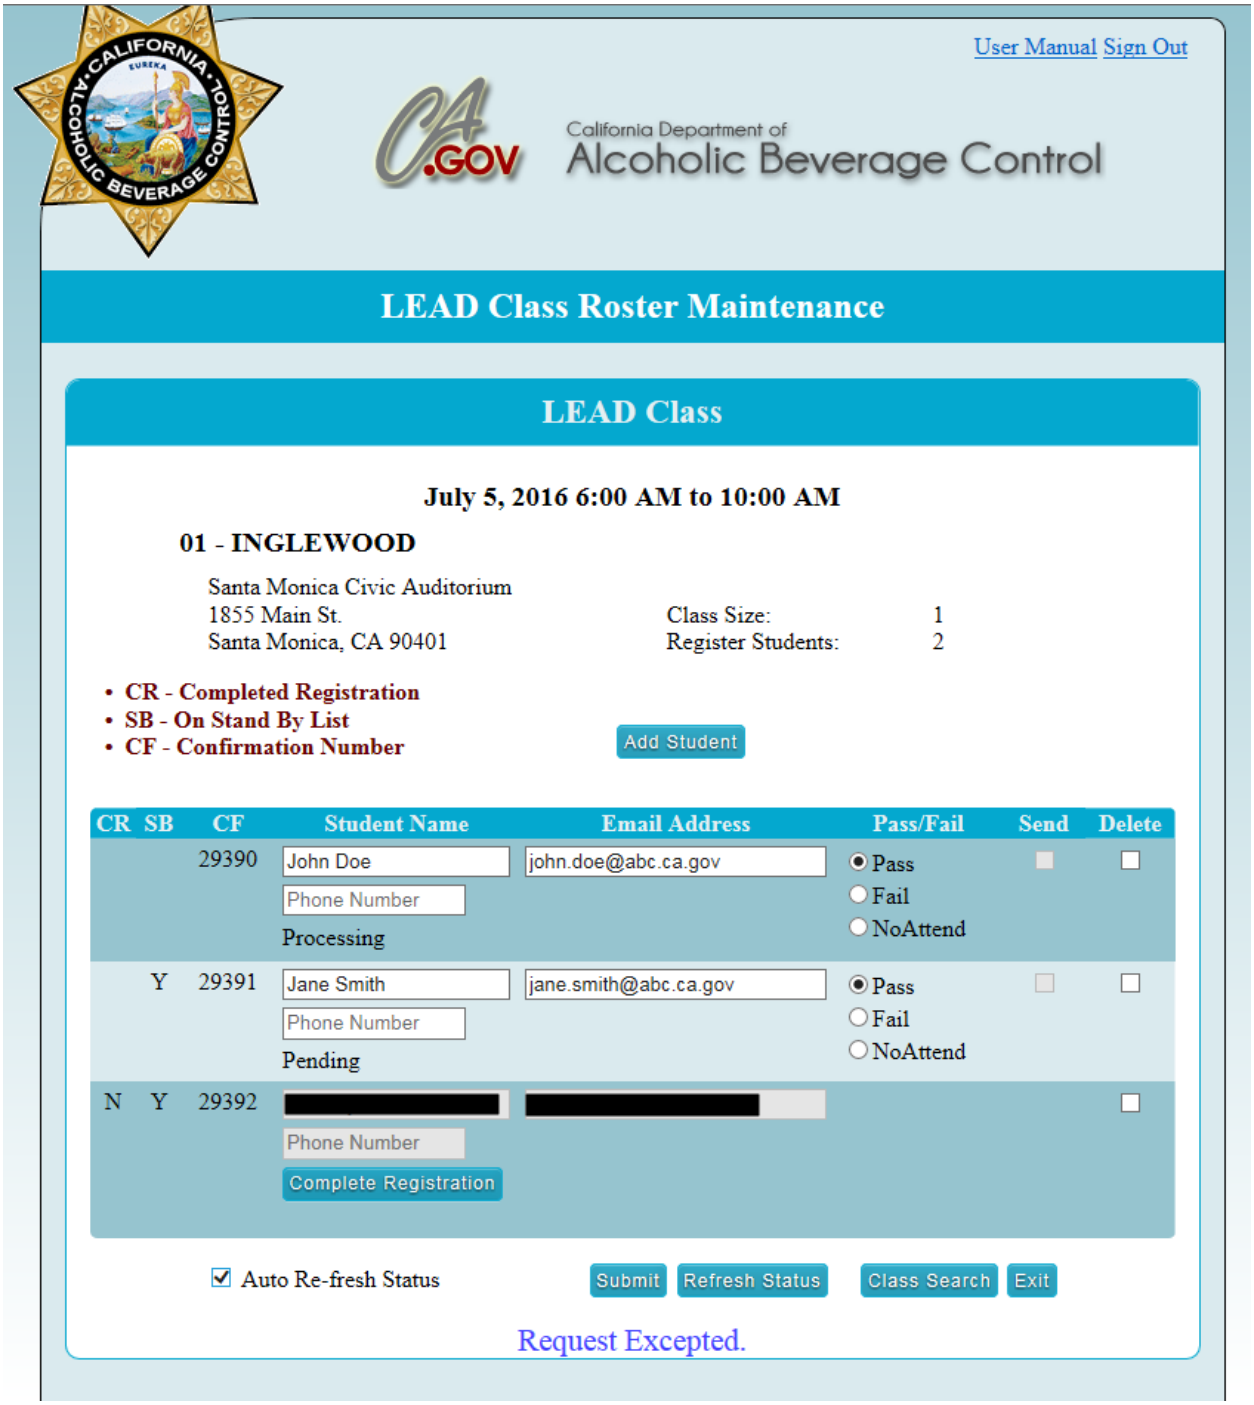

Figure 6 – Sending Email Status while Processing

DELETE STUDENT:

- Click on the **Delete** check box
- Click on **Submit** button to **Delete** the student.

ADD STUDENT:

Click on the "**Add Student**" button and the following screen will be displayed.

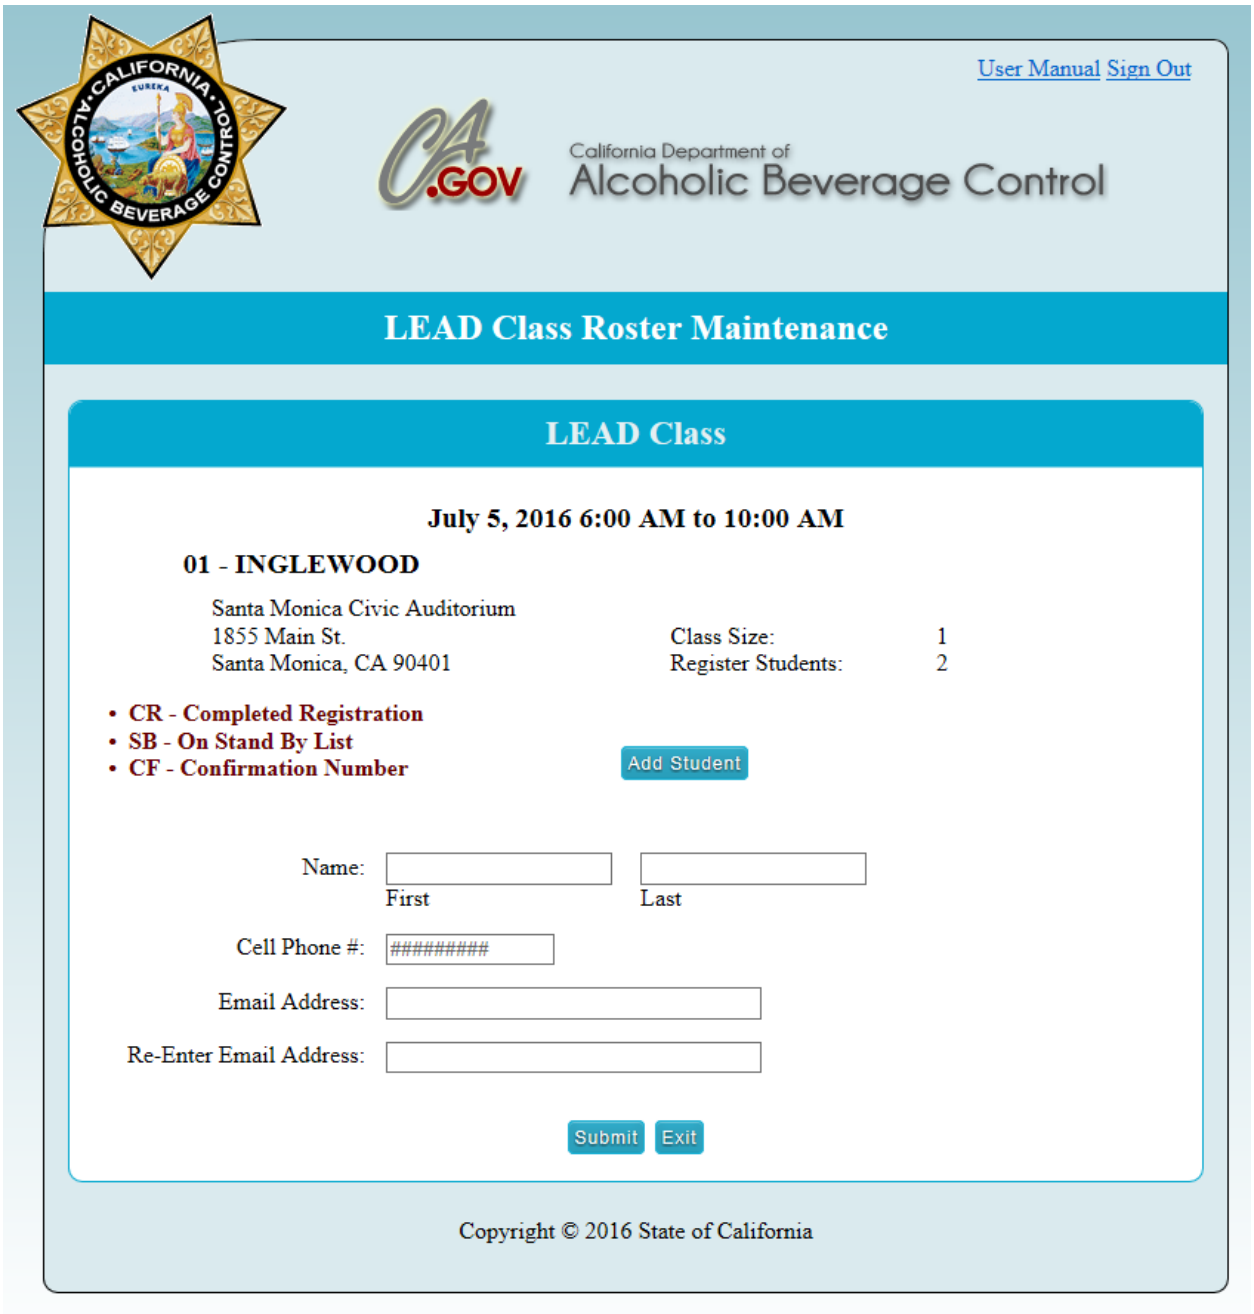

Figure 7 – Add New Student

Enter the student information and click on **Submit** button. After the student has been added, the **Class Roster** page will be redisplayed with the new student at end of the roster. When a student is added through this screen, the student will be in **Completed Registration** status but "**NO**" Confirmation email will be sent to the student.

STUDENT SEARCH PAGE

The **Student Search** page allows you to look up a single student by **Name**, **Email Address**, **Confirmation Number**, or by **Phone Number**. You only need to enter search information in one of the fields. If you enter information in more than one field, each field must match the information in the database field in order to show up in the **Student Result Page**. All searches are case insensitive.

Figure 8 – Student Search Page

Searches By:

- Name: You can enter full or partial first or last name. It will return all students that match what was entered. If you enter "thy" for the name, any name with "thy" anywhere within it will be returned. Example: all students with the name "timothy" will be returned.

- Email Address: You can enter the full email address or just a partial address. It will return all students that match what was entered. When only a partial email address is entered, every student with a match to email address entered will be returned. Example: if a student email address was "first.last@abc.com" and "last" was entered, this student would be returned in the result set.
- Confirmation Number: Is exact match only
- Phone Number: Is exact match only

Figure 9 – Student Search Result Page

The **Search Results** page can display more than one student depending on the search criteria entered or the same student more than once if register in different classes.

Once the student is found then click on the **Select** button for that student to display the student information.

STUDENT INFORMATION PAGE

On the **Student Information** page, the following is displayed, the date and time of the class, the district, the class location, and the following student information will be displayed.

- Flag to indicate if student had finished the registration process
- Flag to indicate if student is a standby student
- Students confirmation number
- Student name
- Email address
- Student phone number
- Pass, Fail, and NoAtted status
- Certificate Status
- Certificate processed date
- Send check box to send certificate or failed class email

As on the **Student Roster**, certain student information can be changed and saved before a new **Student Certificate** is issued.

Also the page provides the ability to completed registration process for a student if not yet completed.

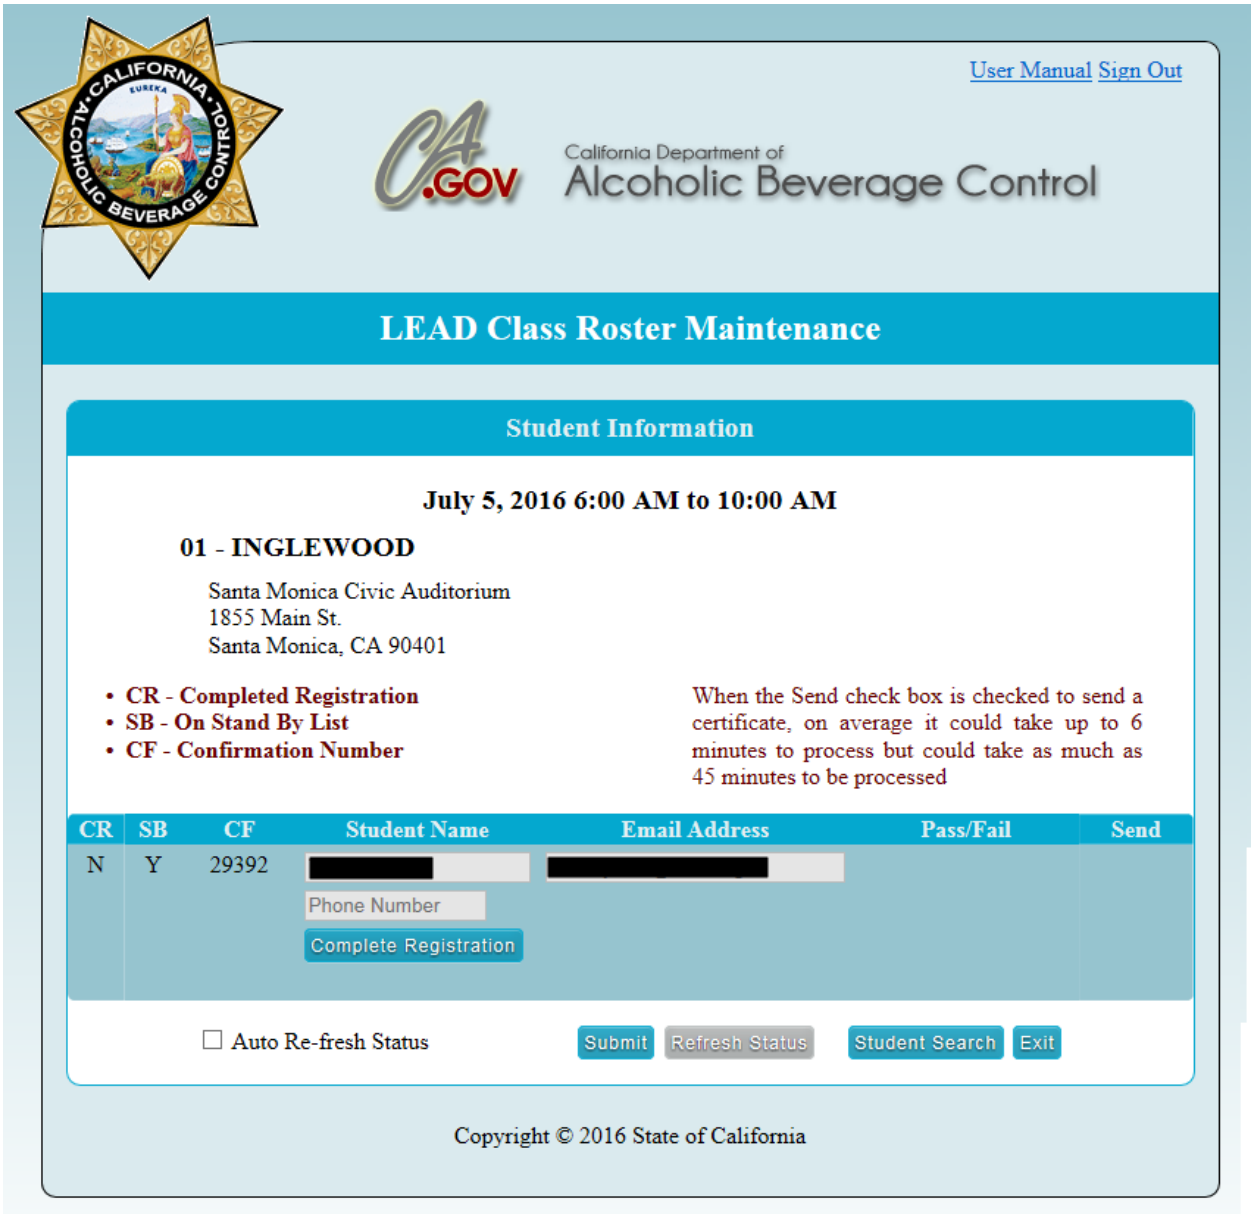

Figure 10 – Student Information Page (Registration not Completed)

Before any changes can be made to a student record, the student must have finished the registration process. This screen does provide the ability to complete the registration process for the student. If any student displayed on the screen that has not completed the registration process will have under the phone number text box the button "**Complete Registration**" to complete the process. Clicking on the "**Complete Registration**" will immediately update the student to **Completed Registration** status (***NO*** *confirmation email will be sent to the student*).

Figure 11 – Student Information Page

CORRECTIONS TO STUDENTS:

- Enter any change in the text boxes and or can select whether or not the student Pass, Failed, or did not attend the class (**NoAttend**). When **Pass** or **Fail** radio buttons are selected, the **Send** check box is automatically checked.
- Once all the changes have been completed, click on the **Submit** button to update the student record. Also if the **Send** check box is checked, a Pass (certificate) or failed email will be sent to the student.

Even if a student status shows that a certificate has been generated and emailed, you still can send another certificate to the student.

SEND EMAILS:

- If **Pass** or **Fail** not selected, select whether or not the student passed or failed the class. When selected, the **Send** check box will automatically be checked.
- If **Pass** or **Fail** was already selected, click on the **Send** check box
- Select **Auto Re-fresh Status** check box if you want the status of the processing of the certificates be automatically retrieved between every 20 to 30 seconds to monitor the process of the certificates being generated and emailed. If not checked, the manual **Refresh Status** button can be clicked on to get the current student status. (Do not make any changes after submit if using **Auto Re-fresh**)
- Click on **Submit** to send emails and update any other correction made to the student record.
